July 8, 2019

Dear Resident:

The City of Avon is making final preparations to begin a widening of Chester Road between State Route 83 and American Way. The project will consist of widening Chester Road from 2 lanes to 3 lanes between American Way and Traveler's Point with pavement resurfacing from American Way to SR 83 (Center Road). This project will also include drive apron and side street intersection reconstructions, storm sewer upgrades and the replacement of the 12-inch water main through the limits of the project. The contractor selected to perform the work is Liberta Construction.

Construction is expected to begin in the second half of July and be substantially completed in early December. Final restoration of permanent pavement markings, seeding and mulching may not occur until the spring of 2020, weather depending.

**During construction, existing two-way traffic patterns will only be maintained between State Route 83 and Traveler's Point. West of Traveler's Point, traffic will only be maintained one-way in the westbound direction and eastbound travel will be closed.** A posted detour route will be provided for Chester Road eastbound traffic. Flashing Message Boards, Detour Signs, other Maintenance of Traffic Devices, and occasionally Police Officers with Patrol Cars will be in place during construction to inform and safely guide vehicular traffic through the project construction zone. Please see the attached Maintenance of Traffic exhibit for more details.

This project will require the coordination of new connections with the Avon Water System. During this process it is possible that your water service may be interrupted for short periods of time. A 48 hours notification will be provided in advance of any scheduled interruption in water service.

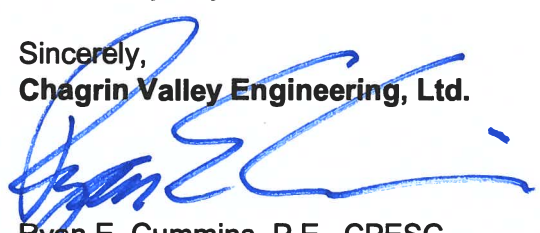

Driveway access along Chester Road will be maintained but may be limited at times. Signs and barricades will be provided around all work areas.

The safety of the general public and the construction workers is of the utmost importance during the construction of the project.

Your patience and cooperation through the construction process is greatly appreciated.

Should you have any questions with regards to this project please feel free to contact Scott Wood from Chagrin Valley Engineering at 440-317-7050. In addition, a public open house will be held on Monday July 15<sup>th</sup> from 4:00 to 6:00 PM if you would like to ask any questions in person.

Sincerely,  
**Chagrin Valley Engineering, Ltd.**

Ryan E. Cummins, P.E., CPESC  
Avon Consulting City Engineer
